

GUSTAVO BONI

Senior Unity Developer

Orlando, FL | (407) 590-9604 | gustavo.boni@gmail.com | [LinkedIn](#) | [GitHub](#)

Authorized to work in the U.S. — O-1B visa (Extraordinary Ability)

SUMMARY

Senior Unity Developer with 15+ years architecting and shipping 20+ titles across mobile, web, console, and PC. Deep expertise in Unity, C#, and gameplay/systems architecture, with a track record of titles surpassing 1M downloads and EdTech games reaching 250K daily active users. Hands-on with performance optimization, CI/CD automation, and multiplayer (Photon). Comfortable owning systems end to end — from architecture and live ops to leading small cross-functional teams.

CORE SKILLS

Engines & Languages: Unity (10+ yrs), C#, C++, Unity UI Toolkit

Architecture & Patterns: SOLID, modular systems, finite state machines, Memento / Facade patterns, gameplay & simulation systems

Multiplayer & Networking: Photon (PUN, Quantum)

Platforms: iOS, Android, WebGL, PC / Steam, PlayStation Portable

DevOps & Automation: Unity Cloud Build, Addressables, CI/CD pipelines, Node.js scripting, AWS CLI, Git, Perforce

Production & Collaboration: Agile / Scrum, sprint planning, roadmapping, stakeholder management, Jira, Confluence

EXPERIENCE

Senior Unity Developer & Technical Consultant

Feb 2026 – Present

Plan A Technologies

Remote

- Deliver Unity/C# development and technical consulting across multiple concurrent client projects spanning games and interactive software.
- Lead requirements analysis, technical scoping, and effort estimation, and build integrations with third-party systems.

Lead Game Developer / Producer

Oct 2022 – Jun 2025

Shoelace Learning

Remote (Canada)

- Led development and shipped Dreamseeker Drift (60K DAU) on a school-year deadline, coordinating a 5-person cross-functional team across art, engineering, and product.
- Contributed core gameplay systems to Dreamscape, an educational WebGL/Unity title averaging 250K DAU.
- Cut web hosting costs 20% by optimizing Unity Addressables asset delivery and caching for Chromebook-class hardware.
- Built a custom Node.js CI/CD tool that automated WebGL builds from Unity Cloud Build to AWS, saving ~4 hours/week of manual deployment.
- Modularized core Q&A gameplay systems, reducing new-title development time ~30% through reuse.
- Ran all Agile ceremonies and maintained production roadmaps across multiple concurrent EdTech titles.

Senior Game Developer

May 2021 – Sep 2022

Shoelace Learning

Remote (Canada)

- Delivered core gameplay features for educational Unity games targeting K-8 students.
- Automated batch upgrade of 800+ Spine animation assets via CLI scripting — 2 days versus an estimated 3 weeks manually.

Co-Founder & Lead Developer

Feb 2012 – Present (part-time since 2021)

Frozen Logic Studios

Remote / São Paulo, Brazil

- Co-founded an indie studio that has shipped 13 games across mobile and PC, including 5 recent Steam releases (2023–2025).

- Soccer Penalty Kicks: 1M+ Android downloads and 500K+ on Windows Phone; recognized as a Nokia LATAM success case study.
- Built and led teams of 3–8 across full product cycles from concept to live ops.
- Designed and implemented monetization systems (IAP, ads) driving sustainable revenue across the portfolio.
- Owned full P&L: budgets, contracts, and ship/kill decisions on underperforming projects.

Game Developer

May 2011 – Feb 2012

Best, Cool, Fun Games

São Paulo, Brazil

- Developed 2 mobile games that each reached 1M downloads on iOS and Android within their first year.
- Integrated third-party SDKs (analytics, ads, social) to drive engagement and monetization.

Game Developer — Central Technology Group

Nov 2010 – May 2011

Electronic Arts Mobile

São Paulo, Brazil

- Supported EA studios globally with Android porting and performance optimization across 15+ device configurations.
- Collaborated onsite with the Origin team in Los Angeles to ship cross-platform UI improvements; implemented iOS UI features using UIKit.

Game Developer

Aug 2010 – Nov 2010

Glu Mobile

São Paulo, Brazil

- Contributed to early gameplay and system design for Island Adventure and Zombie Isle (iOS), building the projects' foundational codebase.

Game Developer

Apr 2007 – Aug 2010

Kidguru Studios

São Paulo, Brazil

- Led development of Freekscape: Escape From Hell for PlayStation Portable, owning technical decisions from engine selection through certification.
- Evaluated and selected the engine stack (custom framework with Gamebryo rendering, ODE physics, Squirrel scripting) against budget and team constraints.

SHIPPED TITLES

Shoelace Learning: Dreamscape (Web/iOS/Android, 250K DAU), Dreamseeker Drift (Web/iOS/Android, 60K DAU)

Frozen Logic Studios — Steam (PC/Mac): Cozy Garden, My Tiny Garden, Tiny Vending Machines, Watermelon Suika Game, Big Burger Tower

Frozen Logic Studios — Mobile: Soccer Penalty Kicks (1.5M+ downloads), Soccer Free Kicks 2 (400K+), Soccer Free Kicks, Pet Playground, Amazing Maze 3D, Robot DIR, Swamp Adventure, ME

Best, Cool, Fun Games: Bunny Shooter (1M+), Go Go Goat! (1M+)

EA Mobile / Glu Mobile: Origin Mobile (iOS) · Zombie Isle (iOS), Island Adventure

Kidguru Studios: Freekscape: Escape From Hell (PSP), Gorak (PC), Game Futebol Globo (PC/Web)

Perpetual FX Creative: Galactic Bowling (Steam PC — prototype)

EDUCATION

Post-Graduate Degree (Lato Sensu), Game Development & 3D Applications — Universidade Veiga de Almeida, Rio de Janeiro (2007)

B.S., Computer Science — Faculdade de Engenharia Industrial (FEI), São Paulo (2005)

SPEAKING & RECOGNITION

- Nokia LATAM Keynote Speaker — invited to a Lumia device launch as a Windows Phone development success story.
- Campus Party Brazil 2010 — presented a technical deep-dive on PSP development challenges for Freekscape.
- POLI-USP Guest Lecturer — spoke to Computer Engineering students at one of Brazil's top engineering schools on game architecture.
